Section 2: Hazard Identification

United States (U.S.)

According to: OSHA 29 CFR 1910.1200 HCS

Classification of the substance or mixture

OSHA HCS 2012

- Flammable Gases 1
- Compressed Gas
- Simple Asphyxiant

Label elements

OSHA HCS 2012

DANGER

Hazard statements

- Extremely flammable gas.
- Contains gas under pressure; may explode if heated.
- May displace oxygen and cause rapid suffocation.

Precautionary statements

Prevention
- Keep away from heat, sparks, open flames and/or hot surfaces. No smoking.

Response
- Blowing gas fire: Do not extinguish unless leak can be stopped safely. Eliminate all ignition sources if safe to do so.

Storage/Disposal
- Protect from sunlight. Store in a well-ventilated place.

Other hazards

OSHA HCS 2012

- Under United States Regulations (29 CFR 1910.1200 - Hazard Communication Standard), this product is considered hazardous.

Section 3 - Composition/Information on Ingredients

Substances

- Material does not meet the criteria of a substance.

Section 4: First Aid Measures

Description of first aid measures

Inhalation
- IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Administer oxygen if breathing is difficult. Give artificial respiration if victim is not breathing. If signs/symptoms continue, get medical attention.

Skin
- Material is a gas. Skin (dermal) absorption is not a likely route of exposure.

Eye
- Flush eyes with water for at least 15 minutes while holding eyelids open. If eye irritation persists, get medical advice/attention.

Ingestion
- Material is a gas. Ingestion is not a likely route of exposure.

Most important symptoms and effects, both acute and delayed

- Refer to Section 11 - Toxicological information.

Indication of any immediate medical attention and special treatment needed

Notes to Physician
- All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Section 5: Firefighting Measures

Extinguishing media

Suitable Extinguishing Media
- SMALL FIRES: Dry chemical or CO_2.
- LARGE FIRES: Water spray or fog.

Unsuitable Extinguishing Media
- No data available.

Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards
- EXTREMELY FLAMMABLE
- Will form explosive mixtures with air.
- Vapors may travel to source of ignition and flash back.
- Containers exposed to fire may vent and release flammable gas through pressure relief devices.
- Containers may explode when heated. Ruptured cylinders may rocket.

Hazardous Combustion Products
- No data available.

Advice for firefighters

- Gas fires should not be extinguished unless the flow of gas can be stopped. Only authorized personnel should turn off valves or attempt repairs.
- Firefighters should wear self-contained breathing apparatus (SCBA).
- Natural gas is lighter than air and will vent upward but special consideration should be given to areas that may trap or contain gas and areas of possible gas migration underground of through structures.
- Water mist may be used to cool surrounding structures including compressed gas cylinders or tanks.

Section 6 - Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Personal Precautions

- Ventilate the area before entry. Wear appropriate personal protective equipment.

Emergency Procedures

- ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). As an immediate precautionary measure, isolate area for at least for at least 100 meters (330 feet) in all directions. Keep unauthorized personnel away. Keep out of low areas. Stay upwind.
- LARGE RELEASE: Consider initial downwind evacuation for at least 800 meters (1/2 mile).

Environmental precautions

- Prevent entry into sewers, basements or confined areas.

Methods and material for containment and clean up

Containment/Cleanup Measures

- Stop release if possible without risk.
- All equipment used when handling the product must be grounded.
- Use water spray to reduce vapors; do not put water directly on leak, spill area or inside container. Do not direct water at source of leak.
- Isolate area until gas has dispersed.

Section 7 - Handling and Storage

Precautions for safe handling

- Use only with adequate ventilation. Keep away from heat and ignition sources – No Smoking. Take precautionary measures against static charges. All equipment used when handling the product must be grounded. Use only non-sparking tools. Be aware of any signs of dizziness or fatigue, especially if work is done in a poorly ventilated area; exposures to fatal concentrations of this gas mixture could occur without any significant warning symptoms, due to olfactory fatigue or oxygen deficiency. Cylinders should be firmly secured to prevent falling or being knocked over. Use explosion proof electrical, ventilating and/or lighting equipment. Empty containers retain product residue and can be hazardous. Do not cut, weld, puncture or incinerate container. Wear appropriate personal protective equipment. Avoid direct contact with skin, eyes and clothing. Avoid breathing gas. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.

Conditions for safe storage, including any incompatibilities

- Containers should be stored in dry, well-ventilated areas away from sources of heat, ignition and direct sunlight. Protect cylinders against physical damage. Cylinders should be firmly secured to prevent falling or being knocked over.

Exposure controls

Engineering measures/controls

- Adequate general ventilation should be provided when handling. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation or other engineering controls to maintain airborne levels below recommended exposure limits. Use explosion proof electrical, ventilating and/or electrical equipment.

Personal protective equipment

Respiratory • In case of insufficient ventilation, wear suitable respiratory equipment.

Eye/Face • Wear safety glasses.

Skin/body • Material is a gas. Skin (dermal) absorption is not a likely route of exposure.

Environmental Exposure Controls

- Follow best practices for site management and disposal of waste. Controls should be engineered to prevent release to the environment.

Other information

- Odorant may be comprised of some or all of the following components and/or blends thereof: Tetrahydrothiophene, tertiary-Butyl Mercaptan and other Mercaptans. Ensure personnel involved in gas purging operations are fully trained and knowledgeable about safe gas venting practices, the proper use of gas detectors and the danger of relying on the sense of smell alone to detect gas releases.

Section 10: Stability and Reactivity

Reactivity

- No dangerous reaction known under conditions of normal use.

Chemical stability

- Stable under normal temperatures and pressures.

Possibility of hazardous reactions

- Hazardous polymerization will not occur.

Conditions to avoid

- Keep away from heat, sparks and flame.

Incompatible materials

- Strong oxidizers.

Hazardous decomposition products

- Thermal oxidative degradation can produce carbon dioxide and carbon monoxide.

Potential Health Effects

Inhalation

Acute (Immediate)
- This material is a simple asphyxiant. May displace or reduce oxygen available for breathing especially in confined spaces. If this material is released in a small, poorly ventilated area (i.e., an enclosed or confined space), an oxygen-deficient environment may occur. Individuals breathing such an atmosphere may experience symptoms which include headaches, ringing in ears, dizziness, drowsiness, unconsciousness, nausea, vomiting, and depression of all the senses. Under some circumstances of over-exposure, death may occur. The following effects associated with decreased levels of oxygen: increase in breathing and pulse rate, emotional upset, abnormal fatigue, nausea, vomiting, collapse, loss of consciousness, convulsive movements, respiratory collapse and death.

Chronic (Delayed)
- No data available.

Skin

Acute (Immediate)
- Under normal handling conditions, no acute skin effects are expected.

Chronic (Delayed)
- No data available.

Eye

Acute (Immediate)
- May cause irritation.

Chronic (Delayed)
- No data available.

Ingestion

Acute (Immediate)
- Material is a gas; ingestion is not a likely route of exposure.

Chronic (Delayed)
- No data available.
